Fast Ways to Sew Better!	Eat Cookies Clothes	Fashion Presentation	Fashion Presentation	New Angles in Piecing
<p>You will love Kathy's "It's a process" attitude towards fashion sewing as she abandons outdated methods in favor of her own foolproof techniques. Banish the homemade look using her ways. You will like sewing more than ever!</p>	<p>Are you heavier than your ideal weight? Has your body morphed from an hour glass into a sausage? Kathy uses her body as a human coat hanger to demonstrate how her garment's shapes and details keep the eye away from your trouble areas and looking at your best features. Learn what pant leg cut is best for your figure. See how different fabrics can shorten the construction process and affect how you look and feel in your clothes.</p>	<p>Fashions by Patty Dunn</p>	<p>Fashions by Barb Callahan</p>	<p>Create wonderful wearables, quilts, wall hangings, and accessories with an artistic approach using Spiral Piecework. Create new angles by shifting a ruler, use 3-D embroidery, appliqué, or threadwork as an accent. Learn how serging can create the illusion of corded piping and more. It's so much fun to cut apart and sew the pieces back together again. The completed work is always a mystery and an adventure. What looks so involved is actually quite simple. There's always a new twist in design.</p>
